Cumulative Update 10

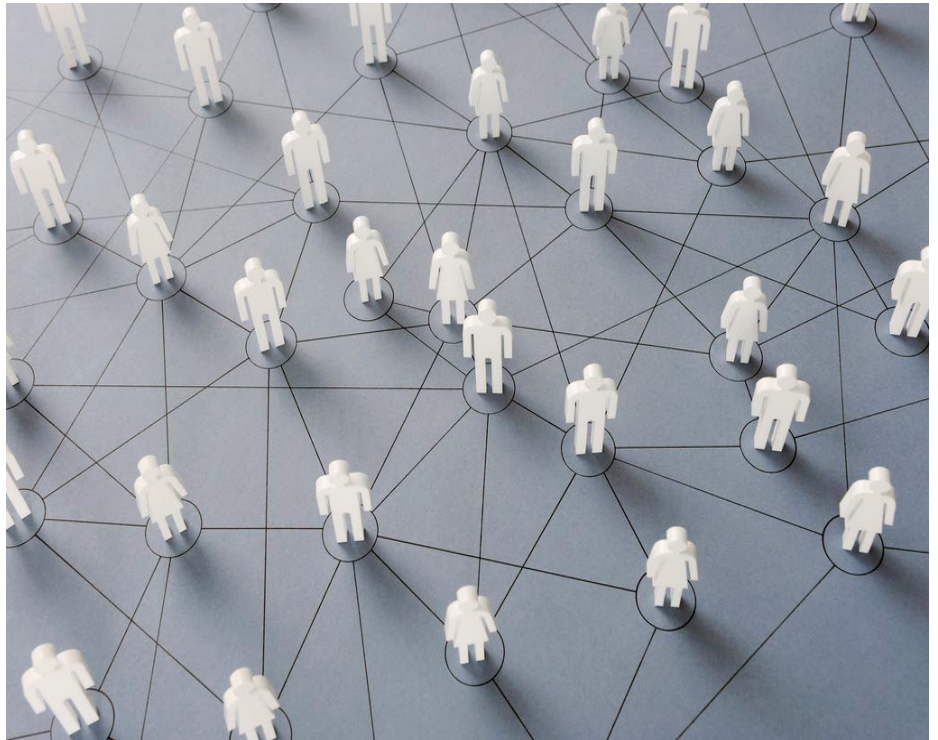

Microsoft released Cumulative Update 10 for Microsoft Dynamics SL version 2018

Training Opportunities

We will be adding training sessions for the Quick Query Tool and Management Reporter in 2024

Acumatica Release 2023R2

Acumatica announces the release of version 2023R2

Cumulative Update 10

Microsoft Released Cumulative Update 10 in August 2023. Although Microsoft announced it will discontinue selling Dynamics SL to new customers in January 2024, they are continuing to support the current version, SL 2018. The update consists of several hot fixes to enhance the functionality of the software.

This is good news to customers currently on the Microsoft Dynamics SL platform as this update extends the life cycle of support for the product by Microsoft. We will continue to support Microsoft Dynamics SL well into the future and will continue to keep our customers up to date on news and announcements from Microsoft.

We strongly recommend clients apply this update to have the latest version of the software. If you are interested in applying the new Cumulative Update, please contact us today.

New Training Opportunities

Based on feedback we have received from clients; DC Tech Group will begin training sessions in 2024 in the following areas:

Quick Query

Quick Query is a tool that allows users to access data and analyze the data however they would like. An example would be, “I would like to see all vendor payments on a particular project for a particular period of time”. Or, “I would like to see payments made to a particular vendor for all projects for a particular time”.

There are pre-configured query templates as part of the standard installation of Microsoft Dynamics SL, so the training course will allow you to start with the pre-configured templates and create different sort and select criteria for the desired result.

Management Reporter

Management Reporter is a powerful tool that allows users to create professional looking financial statements to meet all reporting requirements. Did you know there is a template that can assist users in creating a Statement of Cash Flows?

We will be sharing tips and tricks and the Statement of Cash Flows template with participants to further enhance the user satisfaction with the Management Reporter tool including maximizing row formats, column layouts, and reporting trees.

We are in the process of scheduling these training opportunities in the first quarter 2024. Any feedback or additional suggestions are welcome.
